### Virology - Serology Report

---

**Sample condition**

Acceptable for testing

**Equine Arteritis Virus Antibody ELISA**

Negative

**Equine Infectious Anaemia Antibody**

Negative by ELISA

**Sample condition**

Acceptable for testing

**S. equi Antibody ELISA to Antigen A**

0.0

**S. equi Antibody ELISA to Antigen C**

0.0

**Comment**

ELISA results for antigen A and antigen C  $\leq 0.2$  are considered negative, although a second sample taken 10-14 days after the first, would be required to rule out exposure to S. equi around the time of the first sample.

Please let us know if we can help further.

**Mr Adam A Cummings BSc (Hons)**

**Microbiology Technician**

*These results pertain only to the sample supplied by the client named above.  
Please refer to the AHT website ([www.aht.org.uk](http://www.aht.org.uk)) for details of test methods.*

**Charges will be included on the final report**
